BRITISH SAFETY SERVICES

The CITB-Construction Skills Site Supervisor Safety Training Scheme Refresher Certificate

Course Introduction

This course is designed for delegates who have previously passed the two day Site Supervisor's Safety Training Scheme course and can provide proof of successful attendance. It aims to bring health and safety knowledge up to date, as well as giving a thorough overview of the legislative changes and their impact in the workplace. The course includes a wide range of topics which have been affected by the changes to procedures built upon the material in the original course.

Its aim is to ensure that candidates continue to have an overview and understanding of best practice as regards their responsibility for supervising and helping to oversee safety in a construction site environment.

The course includes a wide range of topics, many building on the previous two-day course programme as well as introducing new subjects. The certificate has to be renewed every 5 years by attending this SSSTS refresher up-date course.

Who can attend?

Only those delegates who hold an existing SSSTS or subsequent Refresher qualification, and provided evidence to the Training Provider before attending the course, are eligible to attend the refresher course. Failure to attend the refresher course within expiry of an existing certificate will require delegates to re-enter the scheme by completing the full SSSTS course if they wish to remain in the scheme.

If a delegate cannot provide a copy of their certificate, it may be possible to receive confirmation from ConstructionSkills Helpdesk on 0844 844 1315.

Course Objectives

Upon completion of this course, candidates will be:

- aware of, and able to implement all updated health, safety, welfare and environmental legislation which affects them in their role as a supervisor.
- aware of and able to implement new guidance and industry best practice affected by changes.
- more aware of their duties and responsibilities with regard to health, safety, welfare and the environment.

Course Content

The main topics covered by the syllabus will be best practice in areas such as:

- Current problems and changes of legislation concerning the Construction Industry
- Current HSE enforcement priorities
- Health and Safety Law: Health and Safety at Work Act, Regulations, Otders, Approved Codes of Practice and Guidance Notes
- Fire
- Vibration
- Noise
- Asbestos/Silica
- Drugs and Alcohol
- Stress
- Risk assessment and safe systems of work
- Hazardous substances
- CDM Regulations
- Work at height
- Musculoskeletal – Manual Handling
- Communication – Tool Box Talks
