

BRITISH SAFETY SERVICES

The IOSH Supervising Safely Certificate

Target Audience

This course is aimed at supervisors to introduce them to the concept of a safety management implementation through monitoring, intervention and coaching.

Course Aims

This course has been designed on a modular basis. The modules include the following:

- Health and Safety Legislation
- Risk Management
- Supervisor Behavioural Based Safety Management Programme
- Common Hazards

Course Objectives

Upon completion of this course, candidates will be able to:

- identify health and safety legislation of relevance to their responsibilities
- understand the purpose of risk assessment
- identify hazards (PEME)
- rate the risk associated with each hazard
- select appropriate workplace precautions for specific risks
- understand the various monitoring techniques (pro-active and reactive) and their role in the process
- conduct unsafe act and unsafe condition reviews (USAACR)
- conduct adequate investigations of incidents and record results as per company procedures
- understand the principles of accident prevention
- understand the purpose of behavioural modification
- identify unsafe acts/conditions using USAACR
- understand the importance of verbal feedback
- measure the performance of employees and contractors in their area of responsibility to identify and combat trends.
