Course Content

A one day, industry specific training course to renew your Quarry Safety Passport. It updates the topics covered by the longer passport course, to recap:

- The law
- Work place safety
- Fire precautions
- Accidents and first aid
- Hazardous substances
- Manual handling
- Noise
- Health and Safety Management of Quarries
- A brief overview of responsibilities
- Vehicle Safety
- Causes of accidents within the industry.
- Statistics, types of vehicles vehicle operation, Managers rules.
- Danger Areas
- Identified within the operation.
- Machinery Safety
- Dangers from machinery, benefits of safety devices, lock off and permit to work procedures
- Main risks in quarries, dust, diseases, noise and vibration.
- PPE
- Environment
- Public perception, external control mandatory standards.
- Working at Heights
- Systems of work, hazards and safety controls
- Operations associated with excavations will be covered
- Dangers arising from work in confined spaces.

On successfully completing the course and multi-choice tick box questions delegates will leave with a credit card style "Safety Passport", complete with their photograph.

Benefits of Safety Passport Training

- Low cost provision of basic health, safety & environmental awareness training.
- Endorsed by the Health & Safety Executive.
- Consistency of induction to a national standard.
- The SPA Passport offers nationally recognised, accredited professional training.
- Passport is valid for 3 years and thereafter only a one-day refresher course.
- Cost effective.
- Increased safety awareness contributing to higher standards of safety.
- Knowledge that the company cares about the individual..
