CCNSG Safety Passport – the engineering construction industry safety card

The CCNSG (Client Contractor National Safety Group) Safety Passport is the engineering construction industry safety card. Workers must have a valid CCNSG Safety Passport to enter many engineering and construction sites. As a result, around 30,000 people complete the course each year.

The National Course

The CCNSG National Course is a two-day training course in basic site safety. On completion, successful candidates receive a CCNSG Safety Passport. This is the engineering construction industry safety card, which is valid for three years.

The CCNSG National Course covers the following topics:

- Safe behaviours at work
- Consequences of good and bad safety practices
- Health and Safety at Work Act 1974
- Risk assessments, including fire safety, hazardous substances and asbestos
- Hierarchy of control
- Manual handling
- Provision and use of work equipment regulations
- Hand Arm Vibration Syndrome
- Working in confined spaces and working at height
- Lifting Operations and Lifting Equipment Regulations
- Site transport
- Signage
- Excavations
- Electric/Isolation
- Environment, including noise
- Reporting of Injuries, Diseases and Dangerous Occurrences
